Our Kid's English Learning Programme is designed to help children learn English in an interactive and fun way. We use a variety of methods, such as games, songs, activities, and stories, to help children learn the basics of English language. We also incorporate the use of technology with online activities and videos to give kids an immersive experience. We focus on the fundamentals of English grammar, pronunciation, and vocabulary to help kids become confident users of the language. Our classes are taught by experienced teachers with a passion for teaching.

An overview of the course

Day1-5

The first five days cover topics such as self introduction, WH- questions,simple present tense, past tense and daily use structures.

Day 6-10

In the next five days, the students will learn simple future tense, Modal auxiliaries, public speaking and to ask different types of questions along with more daily use structures.

Day 11-15

The third week helps the students to speak English more fluently through various activities such as pictoral descriptions, Presenting a cookery shows,other topics covered during the week including phonemic sounds, Parts of speech, etc.

Day 16-20

The final week of the course assists the students to speak in English during different daily life situations and enhances their presentation skills. The common mistakes while communicating in English is corrected.

After the completion of the Kid's English Programme, the young learners become confident communicators with excellent hold of the language.
